### Abstract

A proper teaching curriculum for children's behavior is the basic norm of having a well-behaved future life, especially during the period from kindergarten to elementary school, which is the fastest development period of children's bodies and minds. Meanwhile, the morality education is the basis of education, and it exists in daily life. The meaning and definition of morality education is through the process of teaching and learning in order to develop the moral, emotion, and activity that are requested in social life. If we can put morality education in children's exercise-games, it would be more practical and pragmatic. It is because children could build up the mode of learning and dealing with interpersonal relationship for the future throughout the interaction with others in all games or exercise, and children would grow up towards the right path.

**Keywords:** child education, morality education
