Division of Research and Analysis

ABSTRACT

In order to survey the quality of the marketed warfarin tablets in Taiwan area, a total of 6 samples were collected from different counties and cities in Taiwan during April thru September 2010. Samples were analyzed by the methods as described in the CHP 6th ed. The items of analysis included components identification, dissolution test, content uniformity and assay. All samples met the compendia requirement for warfarin tablets.

Key words: warfarin sodium, analysis
