ABSTRACT

In order to survey the quality of the marketed tranquilizer preparations in Taiwan area, a total of 41 samples (sulpiride, fluoxetine HCl, haloperidol capsules and tablets) were collected from different counties and cities in Taiwan during January thru June 2007. Samples were analyzed by the methods as described in the USP XXVI. The items of analysis include the appearance, components identification and assay. All samples met the compendial requirement for Sulpiride, Fluoxetine HCl, and Haloperidol.
